

# VICTORIA NATURAL COLLECTION

It is an innovative line of products that aims to cleanse, protect and nourish skin, cutis and hair. It is born from the need to create a line of products that can be used every day without cause damages to skin, hair or health in general.

The Victoria line shampoos, masks and treatments are formulated without Sodium Lauryl Sulphate (SLS) and Sodium Laureth Sulphate (SLES), two surfactants or necessary substances that low the “tension”, the adherence of dirty and grease particles in excess allowing the removal with water. They are aggressive for frequent use because they can damage the skin and the hair follicle. Studies demonstrate their negative effect on the cornea and some even speaks of carcinogen effects.
